ECE 322
Lab Reporrt 1

Arun Woosaree

XXXXXXX

September 25, 2019

Introduction

The purpose of this lab was to serve as a practical introduction to rudimentary black-box testing techniques. The testing methods introduced were dirty testing, error guessing, and partition-based testing. It should be noted that numerous other black-box testing methods exist The idea of black-box testing is that tests are carried out with no knowledge of how the software internally works. In other words, the implementation details are a "black box" as the name would suggest.
